3. Outlook

The management performance outlook for NRIC for the fiscal period ending in May 2007 (December 1, 2006 – May 31, 2007) does not change.

[Reference: About Interest Rate Caps]

If an interest rate cap is purchased, when the applicable interest rate exceeds the strike rate, the seller of the interest rate cap pays NRIC an amount corresponding to the interest rate equal to the difference between the applicable interest rate and strike rate on the interest rate reset date.

Consequently, NRIC can in effect hedge the interest rate burden that is in excess of the strike rate and thereby mitigate the risk of interest rate volatility.
